

Impact Powder

IMPACT PASTA for piglets

IMPACT PASTA - for use in prevention of nutritional and intestinal infections and in diarrheal states

Ready-to-use **100% natural** complementary feeding stuff, on the basis of **IMPACT POWDER**, for piglets (and other small animals) during the first days, weeks after birth.

Apply preemptively after the first feeding with colostrum and in diarrheal states according to the dosage on the packaging.

The product works on the biophysical level by joining pathogens and regulating the intestinal transit and the permeability of the intestinal membrane.

Watering and feeding according to the approved recommendations.

The content - 15 ml, a tube dispenser of multiple use.

Ingredients - **IMPACT POWDER**, water, thickeners and stabilizers.

Use in the period before weaning

Up to 4 weeks	Single drench	Apply preemptively to the snout, start with 1 ml after the first feeding with colostrum, repeat periodically every 3-5 days, up to 3 ml in the 4th week. In critical situations - one double dose. Use with watering and feeding according to the recommendations. When feeding with solid feed - use IMPACT POWDER .
1st week	1-2 ml	
2nd-3rd week	2 ml	
4th week	3 ml	

For older animals - **IMPACT POWDER** powder with dosage recommendation according to the instruction
